

Tutorial Navigator Training

Preparation Phase I: Prerequisites for Training Session

The steps mentioned here must be completed before the Training session.

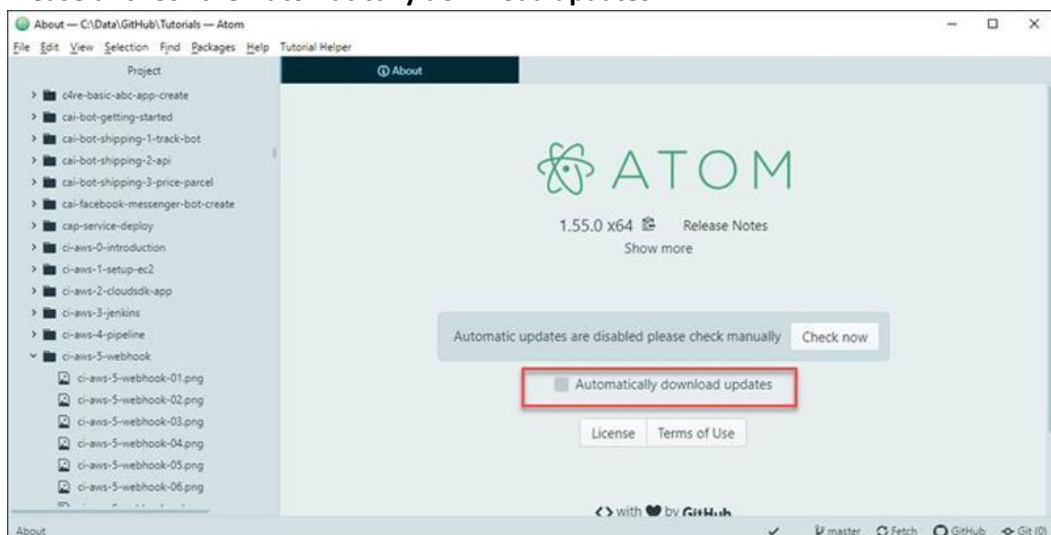

Before you start the training, you will need to:

1. Create a [GitHub account](#) using your SAP email ID as primary address.
 - **Set a meaningful Username that relates to your original name.** All your public interactions in GitHub will be visible to others through your Username.
 - Add your full name and SAP as your company to your GitHub profile
 - Add an image to your GitHub profile
 - Enable 2-factor authentication to your GitHub account, as described in [Configuring 2-factor authentication](#)
2. Link your GitHub account to your SAP identity by going to [Open Source Portal](#). Find the instructions [here](#).
3. In the Open Source Portal, request permission to the tutorials repo by clicking on **Join** for SAPDocuments organization.

If you encounter any issues in getting access to SAPDocuments organization, you can contact [Daniel Wroblewski](#) through email. For more info, see the section on Troubleshooting**.

After completing the above steps, you must install the given software in your system:

1. [Git for Windows](#) or [Git for Mac](#)
 - Git lets you interact with the GitHub repositories
 - **Run installer with defaults**
 - Note: This is different from GitHub Desktop
2. [Atom Editor for Windows](#) or [Atom Editor for Mac](#)
 - To create and edit markdown files for your tutorials
 - Download and run the Atom Editor version 1.55.0
 - Run installer with defaults
 - **Please uncheck the Automatically download updates**

3. [SAP-Tutorial-Helper plugin](#) to the Atom Editor (for both Windows and Mac)
 - Helps you simplify editing the markdown files for tutorials.
 - Follow these steps:
 - 3.1. Download the zip file
 - 3.2. Extract the contents (use Extract Here)
 - 3.3. Run the installer in the install directory (win.bat for Windows, unix.sh for Mac via terminal).
 - 3.4. Command window opens. The installation is complete when you see **Press any key to continue....**

If you have issues during installation, check this [link](#) for troubleshooting. If prompted to enter login, use **20Digital20** as both username and password.

Links/Resources

If you want to know more regarding the steps mentioned above, check these links:

[SAP Tutorial Navigator](#) Jam Page: Learn how to start authoring developer tutorials to be displayed in the SAP Tutorial Navigator within the Developer Center.

[The Big Picture on Tutorials](#) : Learn about SAP developer tutorials, group and mission, how to plan for your tutorials, and the high-level process for creating and publishing them.

[Get Ready to Write Tutorials](#) : Set up your environment to write tutorials, including installing all the necessary tools.

Note: If prompted to enter login, use **20Digital20** as both username and password.

Troubleshooting

If you encounter any issues while going through with these steps, make use of the links provided in the above section.

******After sending mail to Daniel Wroblewski: If you are given permission to the Tutorials-Contribution repo manually, you receive an email to join the SAPDocuments organization (and thereby the Tutorial-Contributions repository). If you lose the email, you can always go to your notifications on GitHub by clicking on the bell icon and accept the invitation there. Alternatively, you can also go to the SAPDocuments organization on GitHub and accept the invitation there.
